

Drafting Grade Emails

Sally A.M. Hogenboom

2023-04-26

Setup

```
library(yOUREmail)
library(tidyverse)
library(magrittr)

# Authenticate & get Outlook Environment
outlook <- Microsoft365R::get_business_outlook()
```

OEO; LS; OCO

Goal

Create a grade email with ‘adaptive’ content for all courses with a single end grade (OEO; LS; OCO).

1. Zip all contents of the students’ `grading_folder`
2. Create a draft-email with:
 1. To: `student_email`
 2. CC: examiner of the course - responsible for processing the grade.
 3. Grade-appropriate-content
 4. `grading_form` & relevant files (in `zip`) as attachment.

NOTE: to change the contents of the email see the code

Requirements

- This code only works for the most recent submission by a student marked as ‘DONE’ (`status`) with a grade.

Execution

```
draft_grade_email(  
    outlook,  
    submission_overview = here::here("NakijkOverzicht.xlsx"),  
    grading_folder = here::here("Ingeleverde Opdrachten"),  
    teacher_name = "Sally",  
    student_id = 85199573)
```

Expected Behavior

1. Zip all contents of the students' `grading_folder`
2. Create a draft-email with:
 1. To: `student_email`
 2. CC: examiner of the course - responsible for processing the grade.
 3. Grade-appropriate-content
 4. `grading_form` & relevant files (in `zip`) as attachment.

Development To Do's

- *None*

OKO

Goal

Create a grade email with 'adaptive' content for all courses with multiple grades (OKO).

1. Zip all contents of the students' `grading_folder`
2. Create a draft-email with:
 1. To: `student_email`
 2. CC: examiner of the course - responsible for processing the grade.
 3. Grade-appropriate-content
 4. `grading_form` & relevant files (in `zip`) as attachment.

NOTE: to change the contents of the email see the code

Requirements

- This code only works for the most recent submission by a student.
- The grade should be pipe separated (e.g., "5.5|Voldoende|6.5")

Execution

```
yOurEmail::draft_grade_email_OKO(  
  outlook,  
  submission_overview = here::here("NakijkOverzicht.xlsx"),  
  grading_folder = here::here("Ingeleverde Opdrachten"),  
  teacher_name = "Sally",  
  student_id = 852464750  
)
```

Expected Behavior

1. Zip all contents of the students' `grading_folder`
2. Create a draft-email with:
 1. To: `student_email`
 2. CC: examiner of the course - responsible for processing the grade.
 3. Grade-appropriate-content
 4. `grading_form` & relevant files (in `zip`) as attachment.

Development To Do's

- *None*
